

## **Intercultural Approach to a Mathematician**

**Ilse Page** (Ludwigshafen)

Living with a Mathematician for more than 30 years sometimes is a special challenge besides the fact, that he is a man. Therefore, it seems to be worthwhile to have a closer look on what is so specific in Mathematician's behaviour and its impact on daily life. In order to have a scientific basis, this talk will refer to the 3 cultural dimensions, E.T. Hall formed in 1990 in order to understand cultural differences.
