

International Symposium on Aggregation and Structures

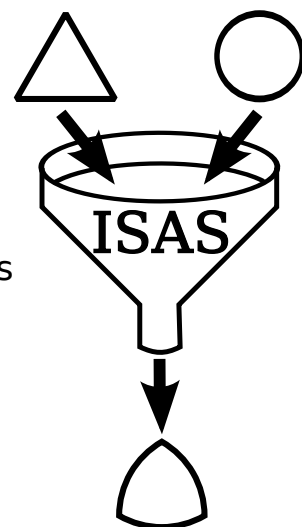

ISAS 2016

Luxembourg

July 5 - 8, 2016

The goal of ISAS is to give the opportunity to researchers to discuss their latest results about **aggregation on structures and aggregation of structures**. It includes, but is not limited to

- aggregation functions on partially ordered sets
- aggregation of structured data
- algebraic approaches in aggregation theory
- general properties of aggregation processes
- algorithmic and complexity aspects of aggregation processes
- functional equations and inequalities for aggregation theory
- judgment aggregation
- applications of the preceding topics

Submission deadline: April 1, 2016
