

A concrete example of complete multifractal analysis: the Bernoulli measure

Stéphane Seuret (Marne-la-Vallée and Luxembourg University)

Time **Friday, March 24, 2017 at 1 pm**

Place **Campus Belval, MNO, room 5A (5th floor)**

In this talk, we perform the multifractal analysis of the Bernoulli measure. This will allow us to see different techniques commonly used to describe the local dimensions of a measure and to compute Hausdorff dimensions of various specific sets.
